Manufacturer & EXPORTER

Authentic Indian Basmati & Non-Basmati Rice

Company Profile

Nature of Business	: Manufacturer, Processor & Exporter
Year of Establishment	: 1998
Products	: Basmati & Non Basmati Rice
Factory Address	: Taraori - 132116, District - Karnal, Haryana (India)
Production Line	: 03 (Automatic)
Production Capacity	: 5,000 Metric Tons Monthly
No. of Warehouse	: 05
Warehouse Capacity	: 25,000 Metric Tons
Annual Turnover	: Rs. 125 Crore or US\$ 15 Million Approx.
Export Percentage	: 70-80%
Main Overseas Market	: Europe, USA, Canada, Saudi Arabia, Bahrain, Lebanon, Qatar, Kuwait, Oman, Yemen, Jordan, Egypt, Turkey, Israel, Iraq, Erbil, Australia, New Zealand, Mauritius
Nearest Port	: Mundra Port, Gujarat (India)
Ownership Type	: Partnership Firm
PAN	: AEKFS5803F
TAN	: RTKS34294B
IEC No.	: AEKFS5803F
APEDA	: 210413
GSTIN	: 06AEKFS5803F1Z1
REX No.	: INREXINAEKFS5803F
USFDA No.	: 14562887126

Our Infrastructure

WE ARE STRENGTHENED BY A STATE OF THE ART INFRASTRUCTURAL SETUP

which covers a large area of space. It is equipped with advanced processing, quality control, packaging and warehousing units. These wings work in a close coordination that enables us to cater rising needs of our clients across the globe. Also, we have excellent storage facilities that ensure to stock our products under hygienic conditions. Owing to this we can store & place a large amount of products that further help us in timely delivery of consignments.

Pre-Cleaning

Removal of all the impurities and unfilled grains from the paddy

Parboiling

Helps in improving the nutritional quality by gelatinization of starch inside the rice grain

De-Stone

Process to separate small stones from paddy

Husking

Process to remove husk from paddy

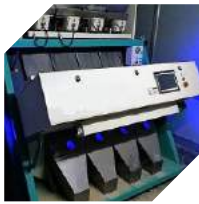

Husk-Aspiration

Separating the husk from brown rice/unhusked paddy

Weighing & Bagging

Preparation of the milled Rice for transporting to the customer

Sorting & Grading

Separation of discoloured and large and small breaks from the head rice concept clarity is required

Polishing

Improvement of the appearance of the milled rice through removal of the remaining Barn particles and polishing of the exterior of the milled kernel

Whitening

Removing all or part of the bran layer and germ from brown rice

Paddy Separation

Separating the unhusked paddy from brown rice

Quality Confirmation

PREPARED WITH THE USE OF HEALTHY AS WELL AS NATURAL PADDY, WE BRING FORTH A QUALITY RANGE

of Basmati Rice such as 1121 Long Grain Basmati Rice, Long Basmati Rice and Non Basmati Rice. At our advanced production units, these products are thoroughly processed using hygienic techniques that ensure to their optimum quality in terms of freshness, nutritional value & purity. Further, our production experts incorporate sound quality control measures in the process of manufacturing so as to come up with an impeccable range of rice.

Indian Rice Products

TYPE OF RICE

There are numerous varieties of rice found across the globe however they generally fall into three categories as below:

Long Grain Rice

Long-grain rice has a slim kernel about four or five times longer than its width. Typical length varies between 6 to 9 millimeters. They are light and remain separated when cooked.

Medium Grain Rice

Medium-grain rice has a kernel about three times longer than its width, measuring between 6 to 4 millimetres. They tend to stick together when cooked.

Short Grain Rice

Short-grain rice has a fat short kernel with high starch content. They cook up soft and sticky.

Form of Rice

Rice is available in a variety of forms. While it is not edible in its rough form, it has to be processed and milled to get the desired form of rice.

Brown: Commonly known as milled or Brown rice, this variety has its inedible outer hull removed. Brown rice gets its color and texture from the bran layer that remains intact on it post hulling process.

Raw: Commonly known as white rice, it is the most common form of rice. It has the outer husk removed which alters its color and texture, while increasing its storage life.

Steam: Steamed rice is a different form of rice which is produced by soaking the grains in water and then treating them with hot steam.

Parboiled: Parboiled rice is the rice that has been partially boiled in the husk to increase the nutritional value of the grain. Parboiled rice is a better source of fiber, calcium, potassium & vitamin B-6 than regular white rice. It also helps in reducing the cooking time.

Indian Conventional Rice

TRADITIONAL BASMATI RICE

It is the original basmati rice which is grown in the traditional way. It's each and every grain cook to perfection and the mere sight and smell make it hard to resist the urge to taste it.

Traditional Raw Rice

- ❖ Average Grain Length - 7.30 MM
- ❖ Natural Field Ad-mixture - Under 5%
- ❖ Moisture - Under 12.5%
- ❖ Broken - Under 1%
- ❖ Damaged Discolor - Under 1%
- ❖ Immature - Under 1%
